Mr. Ahmed Talaat
Deputy Manager of Public Relations
High Dam
Aswan, Egypt

Dear Mr. Talaat:

Both Mr. and Mrs. Stollenwerck and Mrs. Linen join me in thanking you for all of your help during our recent trip. Your invaluable assistance in straightening out the problems we had with our tickets was most appreciated.

The High Dam at Aswan is certainly one of the most dramatic and impressive sights we have ever seen.

I am taking the liberty of sending along to you, under separate cover, a copy of LIFE's World Atlas and the first five books in the LIFE Science Library (Mathematics, Matter, Energy, Machines and The Cell). The Atlas, which Time Incorporated published, contains many photographs of the countries of the world showing not only topography but scenery and people as well. The Science series attempts to simplify and unify the world of science in terms that are comprehensible to the average adult reader. I hope you will enjoy having these books.

Once again, we express our deepest thanks to you.

Cordially yours,

James Linen
